How to setup Feinberg Google Apps accounts on an Android device

To use the Feinberg Google Apps mail, contacts, and calendar apps on your Android, you need to sign in to your @fsm account on your device.

1. Open the Accounts & Sync Settings screen on your device. You can do this in Contacts by tapping Menu and then Accounts, or directly in the Settings application. The Accounts & sync settings screen displays your current sync settings and a list of your current accounts.

2. Touch Add account.

3. Touch Google to add your Feinberg Google Apps account.

4. Touch Sign in when prompted for your Google Account.

1) Enter your full @fsm email address as your username and then enter your password. Note: This is not the same as your NetID username and password. If you do not know your account password, please follow the instructions listed under All Other Accounts to reset it:

http://www.it.northwestern.edu/stucollab/logintrouble.html

5. Select which services you'd like to sync. For M1s: It is advised that you disable synchronizing email since email should be forwarded to your @northwestern.edu account.

Note: You can go back to Accounts & Sync Settings and tap on the account under Manage Accounts anytime to change which services you’d like to sync.

That's it! You can now use your @fsm account from your Android. Just launch Google Calendar from your device's home or applications screen.
