Training Opportunities with NUTORC

**T32 Postdoctoral Research Fellowships (Transplant Surgery Scientist Training Program)**
This program, funded by the National Institutes of Health, combines health services and outcomes research with classroom study leading to a Master of Science in Clinical Investigation (MSCI) degree. For more information on the Transplant Surgery Scientist Training Program, please see [http://nutorc.org/nutorc/education/t32](http://nutorc.org/nutorc/education/t32).

**Internship for Medical and Engineering Students (Year-Round or Summer) and Pre-Doctoral Fellowship**
We offer students (high school, college, medical school, and engineering) from both Northwestern and outside institutions to learn about health services and outcomes research. For more information on research with NUTORC, please see [http://nutorc.org/nutorc/education](http://nutorc.org/nutorc/education).

**Research Thesis Program**
The Feinberg School of Medicine offers its students the opportunity to conduct research during their four years of medical school. We provide an excellent opportunity with broad mentorship and support staff for students interested in health services and outcomes research. Please see [http://www.feinberg.northwestern.edu/education/current-students/research-opportunities/research-thesis-program/](http://www.feinberg.northwestern.edu/education/current-students/research-opportunities/research-thesis-program/).

Please send applications to dladner@nmh.org.
Our Collaborations
We have created interschool, multi-departmental and trans-disciplinary collaborations throughout the years.

Our mission is to create high impact, innovative, trans-disciplinary research at the intersection of seemingly disparate disciplines at Northwestern University focusing on health services and outcomes research in transplantation.

To achieve this objective, we have created focus groups around specific needs of information, bringing together transplant clinicians, health services and outcomes researchers, and investigators with specific methodological expertise.

Getting Started
To investigate possible collaborations, please contact: Daniela Ladner, MD, MPH dladner@nmh.org.

For additional information, please email: CTC@northwestern.edu or visit NUTORC’s web site by going to www.nutorc.org
