Customizing your NUFinancials Home Page

Your NUFinancials homepage is highly customizable. It should be the place you have tiles that link to all of your most used parts of NUFinancials. Here is an example of my homepage with some of the links that I saved:

![Image of NUFinancials homepage with tiles]

Adding something to this page is easy – from the page you want to link, click on the actions list on the top right of the screen and choose Add to Homepage. This brings up a list of your current pages, just select one or you can create a new Home page.

This method also works in myHR.
