The Institute for Translational Neuroscience at Northwestern Medicine currently includes the Centers listed below, which are comprised of leading researchers working together to discover the next generation of therapies for disease and injury to the brain, spinal cord, sensory organs, and peripheral nervous system. As the field of neuroscience continues to expand, the Institute will grow into the future. There is much room for expansion both within and among these Centers.

Asher Center for the Study and Treatment of Depressive Disorders
Northwestern Medicine Lou and Jean Malnati Brain Tumor Institute of the Robert H. Lurie Comprehensive Cancer Center of Northwestern University at Northwestern Memorial Hospital
Mesulam Center for Cognitive Neurology and Alzheimer’s Disease
Norman and Ida Stone Institute of Psychiatry
Les Turner ALS Center
Center for Autism and Neurodevelopment
Epilepsy Center
Eye Institute:
    Center for the Aging Eye
    Center for Retinal Biology
    Center for Outcomes Research, Preventive Ophthalmology, and Epidemiology
    Vision Discovery & Education Center
Center for Neural Bionics
Center for Neurogenetics
Pain Center
Parkinson’s Disease and Movement Disorders Center
Center for Sleep and Circadian Medicine
Women’s Neurology Center
