

INSTITUTE FOR TRANSLATIONAL NEUROSCIENCE AT NORTHWESTERN MEDICINE

The Institute for Translational Neuroscience at Northwestern Medicine currently includes the Centers listed below, which are comprised of leading researchers working together to discover the next generation of therapies for disease and injury to the brain, spinal cord, sensory organs, and peripheral nervous system. As the field of neuroscience continues to expand, the Institute will grow into the future. There is much room for expansion both within and among these Centers.

Asher Center for the Study and Treatment of Depressive Disorders

Northwestern Medicine Lou and Jean Malnati Brain Tumor Institute of the Robert H. Lurie Comprehensive Cancer Center of Northwestern University at Northwestern Memorial Hospital

Mesulam Cognitive Neurology and Alzheimer's Disease Center

Norman and Ida Stone Institute of Psychiatry

Les Turner ALS Center

Center for Autism and Neurodevelopment

Epilepsy Center

Eye Institute:

Center for the Aging Eye

Center for Retinal Biology

Center for Outcomes Research, Preventive Ophthalmology, and Epidemiology

Vision Discovery & Education Center

Center for Neural Bionics

Pain Center

Parkinson's Disease and Movement Disorders Center

Simpson Querrey Center for Neurogenetics

Center for Sleep and Circadian Medicine

Women's Neurology Center
