The Institute for Translational Neuroscience at Northwestern Medicine currently includes the Centers listed below, which are comprised of leading researchers working together to discover the next generation of therapies for disease and injury to the brain, spinal cord, sensory organs, and peripheral nervous system. As the field of neuroscience continues to expand, the Institute will grow into the future. There is much room for expansion both within and among these Centers.

**Asher Center for the Study and Treatment of Depressive Disorders**

**Northwestern Medicine Lou and Jean Malnati Brain Tumor Institute of the Robert H. Lurie Comprehensive Cancer Center of Northwestern University at Northwestern Memorial Hospital**

**Mesulam Cognitive Neurology and Alzheimer’s Disease Center**

**Norman and Ida Stone Institute of Psychiatry**

**Les Turner ALS Center**

**Center for Autism and Neurodevelopment**

**Epilepsy Center**

**Eye Institute:**
- Center for the Aging Eye
- Center for Retinal Biology
- Center for Outcomes Research, Preventive Ophthalmology, and Epidemiology
- Vision Discovery & Education Center

**Center for Neural Bionics**

**Pain Center**

**Parkinson’s Disease and Movement Disorders Center**

**Simpson Querrey Center for Neurogenetics**

**Center for Sleep and Circadian Medicine**

**Women’s Neurology Center**
