

Fourth Annual Lewis Landsberg Research Day

March 19, 2008

Award Winners

<u>First Place, Basic Science Research</u>	\$500
Milan Joksimovic, Postdoctoral Fellow <i>Neurogenic potential of the rostral floor plate</i>	
<u>Second Place, Basic Science Research</u>	\$300
Min Cheng, MD <i>Alpha4 integrin modulates the functional status of c-kit in bone marrow stem cell niche</i>	
<u>Third Place, Basic Science Research</u>	\$100
Rongxue Wu, Postdoctoral Student <i>Cytoprotective Role of Mitochondrial ATP-Binding Cassette Protein-2</i>	
<u>First Place, Clinical Research</u>	\$500
Jarrett D. Berry, MD <i>Remaining Lifetime Risks for Cardiovascular Disease Death by Risk Factor Burden at Selected Ages in Black and White Men and Women</i>	
<u>Second Place, Clinical Research</u>	\$300
Robert J. McCarthy, Pharm D <i>A randomized controlled trial of co-administered hydroxyethyl starch 6% versus lactated ringer's solution on the incidence of maternal hypotension following spinal anesthesia for cesarean delivery</i>	
<u>Third Place, Clinical Research</u>	\$100
Changbin Shi, MD, PhD <i>A defined Immune Response in Human Cerebral Cavernous Malformations</i>	
<u>Outstanding Research Addressing Women's Health (Tie)</u>	\$300
Jacqueline S. Jeruss, MD, PhD <i>The Oncogenic Association Between Smad 3 and Cyclin Overexpression in Breast Cancer</i>	
<u>Outstanding Research Addressing Women's Health (Tie)</u>	\$300
Kazunari Nohara, Postdoctoral fellow <i>A new model of metabolic syndrome: Neonatal programming of leptin resistance by testosterone</i>
