

# 2009 Award Winners

Fifth Annual Lewis Landsberg Research Day

## **First Place, Basic Science Research**

Angela M. Anderegg

*The role of MicroRNAs in midbrain dopaminergic neurogenesis*

## **Second Place, Basic Science Research**

Emily T. Crow

*The first 75 amino acids of the yeast protein Swi1 are sufficient for aggregation in [SWI+] cells*

## **Third Place, Basic Science Research**

Cory L. Simpson

*Desmoglein is required for attenuating EGF receptor signaling in epidermis; a potential role for ERBIN in desmoglein 1-dependent differentiation*

## **First Place, Clinical Science Research**

Hoon Lee

*Hyperglycemia and adverse pregnancy outcome (HAPO) study: A HNF4A variant is associated with fetal head circumference and maternal glycemia in populations of European ancestry*

## **Second Place, Clinical Science Research**

Stephen D. Persell

*A multimodality outpatient quality improvement intervention using precision performance measurement embedded within an electronic health record*

## **Third Place, Clinical Science Research**

Paloma Toledo

*A comparison of the effect of live and web-based education on the accuracy of blood loss estimation*

## **Outstanding Research Addressing Women's Health**

Ann Marie Carias

*Mechanism of HIV entry of HIV into the squamous epithelium of the female genital tract*
