

## AI Workshop Series

Northwestern University Feinberg School of Medicine

Presented by I.AIM with The Garage and INVO

# I.AIM Catalyst: Bring Your Ideas to Life with AI

Tuesdays, June 17 & 24

3:00 p.m. to 5:00 p.m.

June 17 – Active Learning Classroom, McGaw Pavilion, 240 E Huron St

June 24 – Gray Seminar Room, 303 E Superior St

Based on the successful Catalyst experience presented by The Garage on the Evanston campus, I.AIM Catalyst sessions will guide participants on how to use low-code/no-code (aka vibe coding) AI tools to solve research problems and launch novel projects. The two-part workshop series will walk participants through creation of software prototypes without the need for expertise in coding. Course facilitators will demonstrate and provide hands-on training with some of the most recent AI development tools like Lovable or Cursor. Snacks will be provided.

Students, faculty, and other researchers are encouraged to join. No technical experience is necessary. Please bring your laptop.

**Register now for both sessions.  
Space is limited.**
