## Substance Use research training program for Physician Researchers in Emergency Medicine (SUPR-EM)

The Substance Use research training program for Physician Researchers in Emergency Medicine (SUPR-EM) is an early career research training program at Northwestern University which aims to enrich research training for emergency medicine residents.

National Institute  
on Drug Abuse

This program is funded by the  
National Institute on Drug Abuse  
(NIDA R25057711; MPI: McCarthy/Kim).

## Program Description

For the selected scholars, we seek to strengthen their commitment to an academic career in research that is aligned with the strategic plan of NIDA. SUPR-EM training will be focused on three pillars: 1) core didactic curriculum; 2) experiential research training; and 3) professional development. Multiple mentors from emergency medicine and other departments will support each trainee.

The SUPR-EM core curriculum will include workshops and seminars in research methods, substance use topics, and best practices and ethics in research. Scholars will design and execute independent research projects supported by their expert mentors as they prepare for research independence. This program may be of interest not only to those planning to pursue research fellowship, but also individuals interested in Toxicology, Addiction Medicine, Pain Medicine, Palliative Care and Social Emergency Medicine.

## Learn Substance Use Research Methodology

Small group on research fundamentals, substance use topics, research ethics

One-on-one mentorship from established emergency care and substance use investigators

## Access Research Expertise

Commitment from over 20 NIH funded Northwestern Researchers to serve as mentors to SUPR-EM scholars

## Eligibility

Applicants must be resident or fellow trainees within McGaw Medical Center of Northwestern University. Interested applicants should contact Dr. Danielle McCarthy at [d-mccarthy2@northwestern.edu](mailto:d-mccarthy2@northwestern.edu).

## Receive Support for Research Projects & Education

Tuition and travel coverage for completion of the ACEP Research Academy

Up to \$35k in seed funding to support your research project or coursework

Receive research laptop computer while in training at NU

Funding to attend one scientific meeting annually
