

Get to your data faster with our easy-to-use NGS library prep kits.

The unique features of our technology:

- Higher quality control compared to other kits
- Auto-normalization in every kit creates balanced library pools
- Elimination of multiple bead cleanup steps reduces risk of error
- Minimal hands-on time so you can focus on data and results, not pipetting

Discover how you can shorten your time to data with scalable true multiplexing library prep solutions by seqWell.
