The American Transplant Congress (ATC) is an annual meeting hosted by the American Society of Transplant Surgeons (ASTS) and the American Society of Transplantation (AST). Designed for the transplant professional, this meeting focuses on creating a forum for physicians, surgeons, scientists, nurses, organ procurement personnel, and pharmacists to collaborate, to exchange new scientific and clinical information, to review management techniques of recipients, and to facilitate discussion on socioeconomic, ethical and regulatory issues, all surrounding solid organ and tissue transplantation.

The selection process for presenters begins a year in advance and gives priority to those exploring new advancements within the field of transplantation. Platforms for information sharing consist of symposia, oral abstracts, workshops, poster presentations and small group sessions designed for in-depth exploration of both clinical and basic science topics. The Comprehensive Transplant Center had a strong representation with 41 poster presentations, 25 oral presentations and 8 symposium presentations. Featured below are the symposia and oral presentation invitees and to see a full list or learn how to submit an abstract learn more at https://atcmeeting.org. Congratulations to all those that were selected to participate in this annual conference which cultivates discussion and collaboration, which in turn propels the field of transplantation!

**Symposia**
- **Michael Abecassis, MD MBA** presented “Ramification of Transplanting Alcoholic Hepatitis on Allocation and Organ Donation”.
- **Daniel Ganger, MD FACP**, presented “20 years of Contributions to ALF Management: An Update from the ALFSG”.
- **John Friedewald, MD FAST** presented, “Is There a Role for More Personalized Organ Allocation/Donor and Recipient Matching?”.
- **Elisa J. Gordon, PhD** presented “What Does the Patient Under About this Liver? (Medical Ethicist Perspective on Informed Consent in Marginal Organ Transplantation)”.
- **Gwen McNatt, MS, CNN, PhD** presented “Cost Saving Strategies for Transplant Programs”.
- **J. Devin Peipert, PhD** presented “Conversion to improve Adherence: Psychosocial Factors and Therapy”.
- **Anat Roitberg-Tambur, DMD PhD** presented “Optimizing Unacceptable Antigen Listing for Highly Sensitized Renal Transplant Candidates”.
- **Lisa VanWagner, MD MSc**, presented “Cardiovascular Disease Risk Factor Optimization After Liver Transplantation: Do's, Don'ts and Drug Management (Clinician Perspective)”.

**Oral Presentations**
Michael Abecassis, MD, MBA; Mohammed Javeed I Ansari, MBBS; Zeeshan Ahmad Butt, PhD; Juan C Caicedo-Ramirez, MD; Aurora Casillas-Abundis, MD; David Cella, PhD; Rachel Engen, MD; John J Friedewald, MD; Lorenzo Gallon, MD; Elisa J Gordon, PhD, MPH; Michael G Ison, MD; Daniela P Ladner, MD, MPH; Josh Levitsky, MD; Xunrong Luo, MD, PhD; Hariripiya Maddur, MD; John Devin Peipert, PhD; Mary E Rinella, MD; Anat Roitberg-Tambur, DMD, PhD; Valentina Stosor, MD; Edward Benjamin Thorp, PhD; Lisa B VanWagner, MD, MSc; Zheng J Zhang, MD
